Simple Biologics  
**ProGenEx**

**ProGenEX** is a cutting-edge exosome therapy derived from Human Progenitor Endothelial Stem Cells.

**Available in two presentations:** 90 Billion exosomes in 2 cc or 180 Billion in 5 cc, lyophilized for maximum stability and efficacy.

Designed for regenerative applications in aesthetics, wellness, sports medicine, neurology, and pain management.

## ABOUT SIMPLE BIOLOGICS

**Simple Biologics** is a biotechnology company based in Boca Raton, Florida, specializing in regenerative medicine products. We collaborate with physicians, chiropractors, and wellness professionals nationwide to bring advanced biologic solutions to patient care. Our mission is to empower practitioners with scientifically validated, high-quality biologics that deliver transformative results.

## ProGenEX Exosomes

**ProGenEX Exosomes** are extracellular vesicles derived from Human Progenitor Endothelial Stem Cells. These **nanovesicles carry proteins, growth factors, mRNA,** and **microRNA** that signal cells to repair, regenerate, and rejuvenate.

### Available Options:

- 90 Billion exosomes in 2 cc
- 180 Billion exosomes in 5 c

Both are lyophilized (*freeze-dried*) for maximum shelf-life and potency, and reconstituted before use.

# APPLICATIONS & BENEFITS

1

## Aesthetics & Anti-Aging:

- Skin rejuvenation, improved texture and elasticity
- Reduction in fine lines and wrinkles
- Enhanced skin tone and hydration

Before

After

2

## Wellness & Energy:

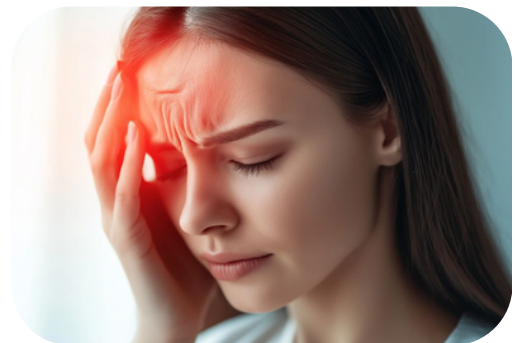

- Boosts vitality and endurance
- Improves recovery from fatigue
- Supports metabolic health

3

## Neurology & Cognitive Support:

- Enhances brain focus and clarity
- Promotes neuroregeneration
- Potential support for neurodegenerative conditions

# 4

## Pain Management & Recovery:

- Reduces inflammation
- Accelerates tissue repair
- Supports musculoskeletal recovery

# 5

## Sports & Performance:

- Enhances muscle repair
- Speeds injury recovery
- Supports joint and tendon health
